

Douglas F. Seaboldt, PE

ASSOCIATE

Mr. Seaboldt has 29 years of professional experience in structural engineering. His experience includes structural design analysis and project management (retrofit and new work) for pharmaceutical, institutional, educational, residential and commercial facilities and parking structures. Douglas also specializes in evaluation and adaptive re-use of existing structures of all building material types helping owners, tenants, property / facility managers and design professionals in evaluations, programming, capital reserve studies, maintenance plans and façade ordinance reviews. His experience includes structural design of new and existing cGMP facilities throughout the country and internationally, existing condition assessments, on-site emergency consultation, multi-discipline coordination, analysis and design for retrofit and new projects, computer modeling, construction validation and compliance, cost estimating, specifications, document production and supervision.
