

Daniel R. Wertz, PE

PROJECT MANAGER

Mr. Wertz has over 20 years' experience in structural engineering. He currently serves as Project Manager acting as both project lead and point of contact for clients. He is a dynamic individual who uses practical engineering experience to develop creative yet cost-effective solutions for a wide range of project types comprised of multiple facets of construction and materials. His expertise includes drawing upon his proficiency in structural design and client relations to serve as the manager for projects ranging from new and existing cGMP facilities and state-of-the-art laboratories to the adaptive reuse of century-old structures. Daniel has worked predominately in the pharmaceutical, healthcare, educational and commercial industries. His experience includes project management, engineering design services, serving as a point of contact for clients from conceptual through final design and construction phases, extensive analytical computer modeling and analysis multi-discipline coordination, existing conditions assessments as well as construction phase consultation services.
