

Jennifer E. Oltman, PE

PROJECT MANAGER

Mrs. Oltman has over 16 years of professional experience in Civil Engineering. Ms. Oltman currently focuses on land development, surveying and municipal engineering. Her experience includes stormwater management design, Best Management Practices design, erosion & sediment control, site grading, storm and sanitary sewer design, municipal code analysis, and commercial and industrial utility relocation. Mrs. Oltman has been the lead civil engineer on multiple pharmaceutical expansion projects including a 40,000 square foot cold storage facility and a 56,000 square foot production facility. Mrs. Oltman is engaged in projects from conceptual design through construction. Prior to joining Mainstay, Mrs. Oltman had over 8 years directly in dam engineering, which included inspection, design, plan preparation, permitting, construction management, testing and inspection, emergency procedures, maintenance and ongoing regulatory compliance. Mrs. Oltman is proficient in all construction practices, means and methods. Mrs. Oltman also has knowledge and experience in the geotechnical engineering industries, including soil and subsurface investigations, mechanical soils laboratory testing, and drilling oversight.
