

Kurt R. Sponheimer, PE

STRUCTURAL PROJECT ENGINEER

Mr. Sponheimer has over 13 years of professional experience in the design, documentation and construction administration of new and retrofit projects. His main responsibilities have included structural calculations, modeling structures, existing condition assessments, production of structural drawings, multidisciplinary coordination, and construction administration for various commercial, educational, health care, manufacturing, pharmaceutical and residential projects. Mr. Sponheimer has design experience with a multitude of building materials, including cold-formed metal, masonry, reinforced concrete, structural steel and timber. His field experience has included spending time in the field making sure design compliance is met. He is proficient with applications such as AutoCAD, Revit Structure (Building Information Modeling), and RISA 3D, in addition to numerous other structural modeling and calculation programs.
