

Pamela J. Assenmacher, PE

ASSOCIATE

Ms. Assenmacher has 30+ years' experience in structural engineering. Her expertise includes the analysis, design, and documentation of a project's structural design from the initial concept phase through the construction phase. Pamela also specializes in working with research and development companies, commercial and corporate firms, federal and state governments and educational organizations. Her responsibilities have included manpower projections and scheduling, work plans, proposals, reports, design estimates, multi-discipline coordination, concept studies and basis of design, specifications, calculations, structural analysis, construction cost estimates, production ACAD, construction schedules, construction observation, and staff supervision. In addition, she is experienced in buildings, pedestrian and facility bridges, foundations and specialized structures, particularly with respect to reinforced concrete and structural steel.
